1. Introduction

These Guidance Notes are intended to assist Applicants in understanding the requirements for requesting and receiving funding support under **Measure 4 – Development of Green Infrastructure** of the MAGF Local Development Strategy (LDS).

Applicants are advised to familiarise themselves with these Guidance Notes prior to filling in and preparing the Application Form. The Guidance Notes, Application Form and all annexes and other documentation are available at www.galmajjistrat.com.

Applicants are reminded to check that they referred to the latest guidance notes as available on the Foundation's website, and that they have filled in the latest available version of the application form that is available for download from the website. Only the latest version at the time of application will be accepted.

2. Rationale for Intervention

Green infrastructure delivers essential ecosystem services which underpin human well-being and quality of life. The European Commission defines green infrastructure as a strategically planned network of high quality natural and semi-natural areas with other environmental features, which are designed and managed to deliver a wide range of ecosystem services and protect biodiversity in both rural and urban settings¹.

Green infrastructure is multi-functional, performing many functions within the same spatial area and providing several benefits to local communities. These include the protection of cultural heritage, conservation and sustainable use of biodiversity, provision of open and recreational space amenities for local communities, increased carbon sequestration, improved flood water management and air quality regulation. The analysis of the territory and consultation findings has shown that the MAGF territory has access to existing green infrastructure, with important natural and cultural heritage and requiring protection, whilst presenting several opportunities for further development of green infrastructure to improve the quality of life of the MAGF communities.

This measure has therefore been designed to support projects that, in consultation with relevant stakeholders, facilitate the development and implementation of green infrastructure within the MAGF territory through the management and protection of biodiversity in rural areas and enhancement of open spaces in village core areas, in the outskirts of the same villages, as well as to provide an interconnected network of green spaces between localities.

3. Scope and Objectives of the Measure

¹ Building a green infrastructure for Europe. European Commission 2013

The general aim of this measure is to invest in green infrastructure of the territory as a means to develop the touristic product of the area. The purpose is to support the development of green infrastructure within the LAG territory through the management and protection of biodiversity in urban and rural areas and embellishment of open spaces.

The specific objective of this measure, by the end of the applicable programming period, is to improve the environment performance and quality of life of LAG communities through the development/improvement of green infrastructure in projects leading to the enhancement and greening of open spaces within the territory which are freely accessible to the public.

The scope of action includes:

- (i) the installation of green infrastructure components and related ancillary works and educational/information actions as a type of non-productive investment with a clear benefit for biodiversity, society and climate change adaptation.
- (ii) the restoration and establishment of infrastructure needed for the management of habitats, such as urban landscape features, soil conservation and water management, the removal of alien species and the planting of new vegetation.

The following, is an indicative list of the type of operations that are likely to be supported through this measure:

- The use of native vegetation and trees in the landscaping of open areas for the creation of recreational spaces, whilst promoting informal education about the biodiversity on the MAGF's territory;
- The regeneration and/or embellishment of open spaces in village core areas and rural outskirts through the development of green infrastructure, accompanied by information on the benefits of green infrastructure within the built environment;
- The upgrading and embellishment, through the use of natural and eco-friendly materials, of open green spaces such as gardens, together with programmes for the promotion of benefits of biodiversity and the ecosystem services which it supports;
- The creation of green belts and green corridors within the territory, linking different localities, and providing a means of educating and interpreting the importance of green infrastructure for biodiversity, climate and air quality.

The operations of such entities must be in compliance with national rules and regulations, and regularly operating within the Majjistral territory.

In the case of natural persons and Voluntary Organisations and, where Public Procurement Regulations allow, Local Councils, a minimum of three (3) comparable and independent quotations should be submitted for each line item. It is being suggested that more than three (3) quotes are obtained. **However, only one quotation is required at application stage.** Applicants are then obliged to present three (3) comparable valid quotations for each line item prior to the project implementation, together with an adjudication report. The applicant should send a letter or email to the chosen and rejected suppliers upon issue of the adjudication report, informing them of the organisation's decision.

It is being further suggested that, for comparability purposes, a financial bid form is issued by the Applicant and presented to the bidder. The bidder would quote the price on the bid form accordingly. The financial bid form must include the signature of the bidder. A copy of the Financial Bid Form can be found in Annex 2 of the Application Form.

Notwithstanding the above, it is to be specified that quotes issued by bidders on their letterhead are also accepted, as long as the description of the items required from the applicant is comparable with the other quotes of the particular line item.

If the cheapest quotation is not chosen by the applicant, a justification would need to be provided. The applicant is to note that in such cases, the amount of funding co-financed through the EAFRD (2014 – 2020) can only be based on the cheapest quotation obtained.

Should for some reason three (3) quotations cannot be obtained by the applicant, a justification why, should also be provided by the applicant and it would be the Paying Agency's prerogative, after consulting with the MAGF, whether to accept such justification or not.

In the case of infrastructural works for Voluntary organisations a Bill of Quantities (BOQ), has to be presented at application stage. This has to be endorsed and dated

by a warranted architect appointed by the applicant. Nonetheless, applicants submitting a BOQ are still obliged to present three (3) comparable quotations for each line item prior to the project implementation.

It is to be noted that any financial declarations / certificates need to be dated not more than three months prior to the date on which the batch closes.

In accordance with the Public Procurement Regulations, expenditure relating to economic operators convicted of a criminal offence are considered ineligible for funding and such expenditure will not be reimbursed by the Agriculture and Rural Payments Agency.

Applicants are guided to refer to the “Guidelines on the Submission of Payment Claims related to Investment Measures” issued by ARPA for details related to the required content and format of quotations and other procurement procedures; these guidelines may be downloaded at the below link:

<https://agriculture.gov.mt/en/arpa/Documents/guidelines/investmentMeasuresPaymentGuidelinesFinalEN-V3.0.pdf>

19. Contracting with Beneficiaries

Contracting shall be undertaken by the MAGF with the beneficiaries. Contracts are to be signed by the LAG’s Chairperson (or any formally authorised delegate) and a legal representative of the beneficiary.

The contract shall be given to the beneficiary for verification prior to it being signed. The contract shall be signed in two originals (one for the LAG and another for the beneficiary). Copies must be maintained in a secure location by the parties.

20. Payment

The Agriculture and Rural Payments Agency (ARPA) reserves the right to make an advance payment of up to 50% of the total eligible cost of the project. The issuing of an advance payment is subject to the submission of a financial guarantee issued by a recognized financial institution equivalent to 100% of the amount eligible as advance payment.

The facility of interim payments will be provided by the Agriculture and Rural Payments Agency (ARPA). Interim payments together with the advance payment (if applicable) will make up 80% of the total eligible value of the grant agreement.

Interim payments must be preceded with a submission of a request for reimbursement and financial documentation (including invoices and receipts).

In case of infrastructural works a provisional certificate of works prepared by an

engineer/architect must also be presented.

The final payment of the remaining 20% of the total eligible cost of the project will be claimed following the completion of the works and submission of the request for reimbursement together with the necessary financial documentation (including invoices and receipts, and a provisional certificate of works prepared by a warranted architect).

Official certification by the architect appointed by the beneficiary is required for settlement of final payment (in case of infrastructural works).

The final payment will be affected once an on-the-spot-check is carried out by MAGF and ARPA and adherence to the contract is confirmed.

The main applicants must present a payment claim through the LAG, so that the necessary verifications and controls are undertaken prior to submission to ARPA for processing.

Claims are to be presented as outlined in ARPA's payment guidelines available at:

<https://agriculture.gov.mt/en/arpa/Documents/guidelines/investmentMeasuresPaymentGuidelinesFinalEN-V3.0.pdf>

In case of irregularities, penalties and sanctions may be applied. These will be deducted from eventual payment claims or through requests for refund of financial assistance paid by ARPA.

The project must be completed, and payment claims submitted by not later than 1 year from signature of contract agreement.

The final claim for reimbursement of funds allocated to the project must also be submitted within this deadline.

21. Extension to Contract Timeframes

Should the beneficiary require an extension to the timeframe stipulated in the application form and contract, a request is to be submitted to MAGF. The form to be used in such case is the '*Change Request Form*' and the request should be made before the actual expiry of the original timeframe.

A request for approval of an extension of the time required in order to terminate the project is to be backed by written justified reasons. Cases related to poor project management will not be accepted. Following review of the request by the MAGF, the final decision will be sent to the beneficiary in writing. Should an extension be approved, the period of extension shall be determined by MAGF.

In cases where amendments to the contract are required, the beneficiary must submit a *Change Request Form* to MAGF prior to the changes being actually implemented.

If a request for changes to the contract is submitted after these changes have actually taken place (ex-post), the changes will not be eligible for funding and, depending on the extent of the changes, this may lead to the whole project being considered ineligible.

The written request for changes must indicate the changes required, the necessary justification and relevant supporting documentation.

If the applicant wishes to change the specification of the investments, a written request prior to such changes must be sent to MAGF. For example, funding is approved for the purchase of Model X of a projector and following the contracting, the applicant wishes to purchase Model Y of this projector as the previous model is no longer produced / available, then a request for change must be submitted and the applicant must wait for a reply from the competent Authority.

MAGF will review the request and if the proposal does not affect the nature of the project and remains in line with the objectives of the Measure, the changes may be approved. A notification letter will be sent to the beneficiary in writing and an addendum to the contract shall be carried out and signed between all parties.

If the request for changes is not approved by MAGF, the beneficiary will receive a notification and will be requested to confirm whether the project as stipulated in the contract will be completed or withdrawn.

22. Failure to comply with the contract

Failure to meet the commitments stipulated in the contract shall result in sanctions applied to the amounts committed or paid. The Agriculture and Rural Payments Agency, Internal Audit and Investigations Department (IAID), the European Commission (EC), the European Court of Auditors (ECA), the European Anti-Fraud Office (DG OLAF) and/or the Managing Authority reserve the right to undertake further checks and controls and to recover any funds from the beneficiary by withholding the bank guarantee in case of advanced payments or to request the beneficiary to refund financial assistance paid out by ARPA.

23. Project Sustainability

It is to be noted that in line with Article 71 of Regulation 1303 / 2013, in the case of an operation in infrastructure or productive investment, the applicant shall repay the contribution from the EAFRD Funds if within (5) years of the final payment to the

beneficiary or within the period of time set out in State aid Rules, where applicable, it is subject to any of the following:

- a cessation or relocation of a productive activity outside the programme area;
- a change in ownership of an item of infrastructure which gives to a firm or a public body an undue advantage;
- a substantial change affecting its nature, objectives or implementation conditions which would result in undermine its original objectives.

24. Publicity

In case of information and publicity, the main beneficiaries must abide by the provisions of Part 2 of Commission Implementing Regulation (EU) No. 808/2014, as well as any Publicity/Visibility Guidelines that may be provided by the MAGF through MA.

In order to meet the requirements of the EAFRD Regulations, beneficiaries must ensure that adequate publicity is given to the project with a view to:

- Making potential participants aware of the opportunities afforded by it;
- Making the general public aware of the role of the Community in relation to the project;
- Ensure transparency of the assistance concerned.
- As an example, materials used by the Beneficiary and major correspondence, including contracts signed with third parties must include any acknowledgement of EAFRD support.
- Any publicity material, such as advertisements, billboards and information leaflets about EAFRD co-financed projects must acknowledge this support.
- Publicity of individual projects must be incorporated into the project budget.
- Applicants are to be cautious when determining publicity actions for the project.
- Applicants should also ensure that the project benefits from any free publicity and that anything that will be proposed to be funded under the project is either obligatory or adds value to the results of the project, taking into account the value for money principle. In this regard, publicity measures of individual projects should take into account the nature of the project and must be relative to the size and objectives of the project.

- The Beneficiary should note that publicity may only be used to increase awareness of what EU funds are used for and to disseminate results. Publicity measures undertaken must be project specific.
- Publicity and information measures must not be used as a marketing tool to promote an organisation, its products, services or infrastructure. Where a project includes an element of marketing, this must be used to complement but not replace the project's obligatory information and publicity measures.
- Marketing efforts should be included as a separate activity in the project and as a separate budgetary allocation and justified accordingly. The Applicant may also make reference to the 'Visual Identity Guidelines' that may be downloaded from the below link:

<https://eufunds.gov.mt/en/EU%20Funds%20Programmes/European%20Agricultural%20Fund/Pages/Links%20and%20Downloads/Publicity.aspx>

25. Data Protection

MAGF has the duty to protect data provided in the Application Form. Any queries regarding Data Protection matters should be brought to the attention of the MAGF. The officer in charge can be contacted by e-mail on: galmajjal@gmail.com

26. Retention of Documents

The applicant is to retain all documentation in a project file (required to ensure any adequate audit trail) safely stored.

All documents pertaining to the implementation of the project must be retained by the applicant for at least five (5) years following the end of the programming period. This is to facilitate audits and the ex-post evaluation of the programme.

27. Basic Terms and Conditions

If a project application is successful, EU Funds will be offered on rigorous terms and conditions, which will be stipulated in the Grant Agreement. In accepting the offer of EU Funds, the Applicant will take on responsibility for compliance with these terms and conditions. These include requirements to demonstrate satisfactory progress in delivering what the project has set out to achieve and adherence to an agreed pattern and time schedule of spending. Failure to meet these conditions and any false information given in the application may lead to the EU Funds being withdrawn and any EU Funds paid being recovered from the Applicant.

All projects are subject to management verifications, audits carried out by auditors (including by the Internal Audit and Investigations Department (IAID), the European

Court of Auditors and the European Commission (EC) auditors), evaluations (programme evaluators) and inquiries by DG OLAF. Officials from the MAGF, ARPA and MA and other horizontal stakeholders would also have rights of access to the project and all relevant documentation. Such officials could carry out spot checks (physical and documentary) to establish that sufficient progress is being made in line with the Grant Agreement and that the Beneficiary has put in place systems of management and control that ensure the efficient implementation of the project in line with the relevant Regulations and Procedures.

If the project is selected for funding, the Applicant would be bound by the principles of transparency, good governance, sound financial management and the relevant national regulations.

By submitting the Application, the Organisation is giving its automatic consent to publishing (including on the internet) the details of the Organisation and the project (including budget and implementation period) in line with the obligations in the relevant Council and Commission Regulations.

The applicant should also be aware of the durability clause enshrined in Article 71 of Regulation 1303/2013, which states that an operation retains the contribution from the EAFRD only if that operation does not, within five years from the final payment of the competent authorities, undergo a substantial modification.

The applicant is to declare whether an application for part or all of the proposed project has been submitted for assistance under any other Community Source including European Regional Development Fund (ERDF), Cohesion Fund (CF), etc. If in the affirmative the applicant is required to indicate all relevant details.

The applicant organisation should note that if the project is accepted, the applicant will be automatically giving his/her consent to have all the documents and data related to the project, (including name of project leader and other persons relevant to the project, invoices, receipts and documents related to contracts etc...) made available to all the relevant stakeholders including third party evaluators and auditors involved in the EAFRD fund system. The LAG reminds the Applicant that it is the responsibility of the Applicant to inform any third parties (including contractors) that all data and information relating to the project will be shared with other stakeholders, local and European.

The chosen entity must ensure that all activities are carried out in compliance with applicable national and community rules and any other mandatory requirements as laid down in the Rural Development Programme for Malta (2014-2020). Failure to do so will result in penalties with respect to the grant received plus interest accrued according to the law.

In case where a Planning Authority (PA) permit is required, the valid PA permit and approved drawings or the application submitted to PA and related drawings have to be presented as part of the documentation with the application. Grant agreements for projects in need of such permits will only be signed once the valid PA permit is granted. MAGF reserves the right to reject any project if the PA permit is not presented in time to allow the project to be completed by not later than 1 year from signature of contract agreement.

Once the applicant endorses the contract with the LAG, the applicant will be automatically be giving its consent to the publication of data related to the payments that the ARPA will eventually be affecting. This will be in line with Regulation (EU) 1306/2013 of the European Parliament and of the Council. The regulation requires all Member States of the European Union to publish details of beneficiaries, who received payments under the CAP.
